

The background is a solid teal color with various light teal geometric shapes scattered across it. These shapes include squares, circles, and crosses, some of which are slightly rotated or offset from the center. The shapes vary in size and are distributed throughout the frame, creating a patterned effect.

Project team

# Who is part of the team?

- ✕ students from Wipperfürth vocational school
- ✕ students from Rakvere vocational school

# Who is the Project Manager?

× Mrs. Linnenkugel

× Harle

Initial situation

## What is the initial situation/ problem?

- × HBFIM learns to
  - × deal safely with accounts
  - × secure data
  - × other students from colleges not informed about topic

# What should change? What should happen? What is the idea?

- ✕ teach and inform other students
- ✕ provide information on a website

Objective

# What should happen during the part-/projects?

objectives:

- × creating a website

- × implementing a password check

# What should happen during the part-/projects?

cost-target:

× no costs

time-target:

× project plan by May 2017

Circumstances

What requirements are there? What influence do these requirements have on the project?

- ✖ understandability for non-experts
- ✖ IT-environment will be used

What requirements are there? What influence do these requirements have on the project?

- ✗ communication language English
- ✗ arrangements in English using digital media
- ✗ document translation into English

What requirements are there? What influence do these requirements have on the project?

- × project work at school
- × usage of common digital media
- × online-meetings

project phases

# Which approach is chosen to reach the target (project phase )

- × planning
- × execution
- × completion

# Milestones

# Milestones

- × completion of planning
- × implementation of website
- × test of website
- × release of website
- × information for target group

# Results

## Which results should be reached?

- × informative website
- × “Safety of digital identity”
- × password check program

# Consequences of implementation

What are the objectives?/  
What is possible with this project?

- ✕ tool to check user passwords
- ✕ online education

## What will be improved?

- × English knowledge
- × profound knowledge in “Identity protection”
- × explanation skills as regards specialized information
- × project-centered approach work

## What positive implications are there?

- × identity will be more safe
- × knowledge of safe passwords

# Consequence of non- attainment

## What we don't receive?

- ✗ website isn't completed
- ✗ website isn't created

Which effects could be expected in these situations?/

Are there possibilities to repeat this project?

- ✗ project unit isn't completed
- ✗ Erasmus+ project failed
- ✗ support money will be lost
- ✗ students stay uninformed
- ✗ repetition isn't possible
